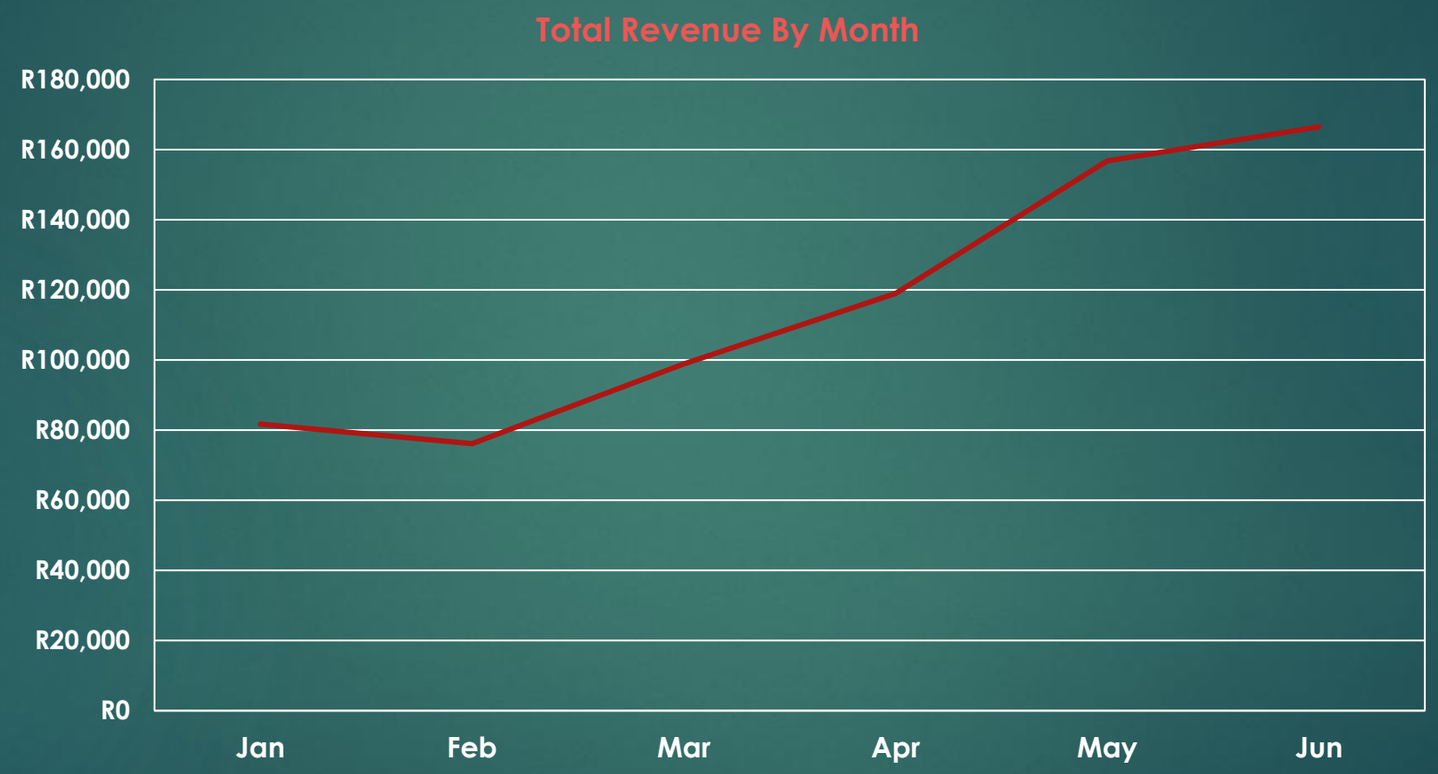
Revenue By month

Total Revenue By month



Key Insight

Store Revenue increases starting from **January** to **June**

Recommendations

☕📈 Product Optimization

•Introduce new premium coffee variations based on local taste to capture higher margin sales and reinforce coffee's 38.6% revenue.
•Loose tea, flavors, and Packaged Chocolate contribute only 3.4% of revenue. Test manager's pick promo – if no uplift, consider phasing out to free up space.
•Ensure consistent quality across all stores.
•Refresh packaging and product visibility on shelves to boost appeal.

💰 Marketing & Promotions

•Maximize morning revenue by launching campaign 'Morning run' Bundle coffee with lower-performing bakery items or tea for higher basket value to increase average transaction value by **10–15%**.
•Launch 'Happy Hour' deals during low-traffic hours: **Buy any 2 coffees or teas at a fixed discounted price.**

⚙️ Operational Efficiency

•Introduce mobile ordering app to reduce in store traffic and waiting times.
•Balance inventory for low-sellers—avoid overstock, invest in targeted sampling.
•Implement an ongoing 'upselling & product knowledge' training program for all staff to boost average order value by **5–10% per customer**.

THANK YOU.
